

ALPAY CAN ALTUNTAS

Senior Software Engineer • Full-Stack • Secure System Design

Memphis, TN (Relocating) • Open to Remote (U.S.)

+49 1516 557 7592 • Alpaycanaltuntas@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Senior software engineer specializing in full-stack development, microservices, and secure-by-design architecture. Have delivered SAP-integrated applications serving 50,000+ users across 40 countries, and led modernization work that lifted customer satisfaction 55% and drove a 20% rise in new contracts. Combine hands-on engineering with product ownership, team leadership, and application security (OWASP, STRIDE, threat modeling). Magna Cum Laude CS graduate (Union University, TN), authorized to work in the U.S. with no sponsorship required, available for Memphis-area or remote roles.

SKILLS

Languages: Python, Java, JavaScript / TypeScript, Dart, Perl, SQL

Frameworks & Tools: Django, React, React Native, Node.js, Docker, Nginx, Git

Architecture & Practices: Microservices, System Design, TDD, Agile / Scrum, Secure System Design

Databases & APIs: PostgreSQL, MSSQL, MySQL, REST APIs, SOAP APIs, JSON

Cloud & Security: AWS, Linux, Networking, Cybersecurity, OWASP, Threat Modeling

Product & Leadership: Product Ownership, Backlog Management, Stakeholder Management, Mentoring

Languages (Spoken): English (C2), German (C2), Turkish (C2), French (A2), Spanish (A1)

EXPERIENCE

cbs Corporate Business Solutions — Hamburg, Germany - May 2024 – Present

Senior Software Engineer & Team Lead - Apr 2026 – Present

- Led modernization of core applications to meet market needs, lifting customer satisfaction **55%** and driving a **20% increase in new contracts (≈€14M added revenue)** for the business area)
- Own end-to-end delivery and system architecture for scalable full-stack applications, microservices, and data platforms with SAP integrations
- Secured system architecture through threat modeling, kill-chain analysis, and OWASP SAMM / STRIDE, embedding secure-by-design principles across services
- Centralized common processes and shared components for cleaner, more consistent system design
- Serve as Product Owner: own backlog prioritization, roadmap planning, and delivery execution
- Lead a cross-functional Agile / Scrum team as Team Lead; mentor engineers and drive best practices

Software Engineer - May 2024 – Apr 2026

- Optimized big-data queries behind electronic invoicing and OCR document scanning, cutting compute and lookup time **70%**
- Expanded supported country solutions from **30 to 40**, partnering with the SAP team and building new API integrations
- Built full-stack and mobile applications (React, React Native, Dart), dashboards, and microservices with SAP integrations serving **50,000+ users**
- Automated data processing and backend workflows in Perl; delivered on PostgreSQL, Docker, and Nginx

Union University — Jackson, TN, USA | Software Engineer (Student Employee) - Aug 2021 – Apr 2024

- Architected and developed dynamic websites and applications (Java, JavaScript, HTML/CSS, ColdFusion, SQL); leveraged SQL analytics to boost user engagement **20%**
- Designed and implemented server- and page-level security policies, reducing vulnerabilities **19%**
- Optimized web and server performance with analytics insights, cutting page load times **15%**

A+M Holding — Hamburg, Germany | Software Engineer (Part Time) - May 2018 – Jul 2020

- Built LAMP-stack web apps and internal accounting software (Java) with SEO strategy — grew site traffic **35%**, engagement **25%**, and cut load times **25%**

EDUCATION

B.S. Computer Science — Union University, Jackson, TN, USA - May 2024

- Magna Cum Laude • President's List (2021–2024) • Student-Athlete Honors (2020–2024)

CERTIFICATIONS & AFFILIATIONS

AWS Solutions Architect • Cisco CCST Cybersecurity • Meta Backend Engineer • Meta Front-End Developer • Google Data Analytics • Google Project Management (2023)
